Unifying Theme: Plants & Soil

Essential Standard and Clarifying Objectives	
3.L.2 Understand how plants survive in their environments.	
3.L.2.1 Remember the functio	n of the following plant structures as it relates to the survival of plants in their environment:
• F	Roots –absorb nutrients
• 5	Stems – provide support
• [eaves – synthesize food
• F	Flowers – attract pollinators and produce seed for reproduction
3.L.2.2 Explain how environme	ental conditions determine how well plants survive and grow.
3.L.2.3 Summarize the distinct	stages of the life cycle of seed plants.
3.L.2.4 Explain how the basic properties (texture and capacity to hold water) and components (sand, clay and humus) of soil determine the	
ability of soil to suppo	rt growth and survival of many plants.
	Unpacking
What do	es this clarifying objective mean a child will know, understand and be able to do?
3.L.2.1 Students know the names and functions of major plant parts (roots, leaves, stems, flowers). Students know that plants have special parts	
that perform special functions in	order for the plant to survive.
3.L.2.2 Students know that how v	well plants grow and survive is determined by a combination of environmental conditions. For example, drought
conditions will tend to diminish p	lant health and growth.
3.L.2.3 Students know the disting	t staged of the life cycle of seed plants (seed, germination, seedling, adult).

3.L.2.4 Students know that different soils possess different textures and capacities for the retention of water and nutrients. Students know that soil consists of different components. Students know that these characteristics of soil influence the growth and survival of plants.
