

New from Achieve3000® for 2014-2015

# Curriculum Planning Tools: lesson planning made easy.

## Start with a schedule of lessons customized to your state standards.

Ensure your students have the literacy and content area knowledge and skills they need to be successful using Achieve3000's standards-aligned courses, automatically provisioned to each class based on your state and grade level.

*Students start off the school year with a curriculum that is customized for their state and grade. Each week features two grade-specific science or social studies-focused lessons, one current events news lesson, and one weekend article.*

## Customize your lesson schedule even further—one day, week, month, or semester at a time, or for your entire academic year.

Use the SEARCH FOR MORE LESSONS panel within your lesson planning page to choose from thousands of additional lessons to further customize your curriculum. Easily drag lessons over from the SEARCH FOR MORE LESSONS panel and drop them into your schedule where appropriate. Navigate between five views—List, Day, Week, Month, and Year (Year view coming later in the fall)—to easily plan and view your entire curriculum. Need a synopsis of your day? Just hit the Day button to see all lessons scheduled. Need to replace all Economics lessons with Citizenship lessons? Use the Year view to remove all Economics lessons with a single click, and use the SEARCH FOR MORE LESSONS panel to add in the new Citizenship lessons.

*Scheduled content is easy to remove. Simply select one or more lessons, subtopics or topics and click the corresponding "remove" link.*

*The new calendar views allow teachers and administrators to easily move lessons around by simply grabbing lesson boxes and dragging and dropping them elsewhere on the schedule.*

## Collaborate with other teachers and administrators across the content areas to meet your instructional goals.

Use the "Other classes with this lesson assigned" section of the lesson details pop-up to see whether other classes in your school have the same lesson assigned. This allows you to coordinate with other teachers in your building in order to use Achieve3000 more effectively. For example, schedule the lesson at the same time in two classes, and ask the social studies teacher to focus on the social studies components of the lesson and the English language arts/literacy teacher to focus on the reading strategy. Or remove the lesson from your schedule altogether to avoid overlap and add a new lesson in from the SEARCH FOR MORE LESSONS panel. Coordinating with other teachers in your building is a snap.

*The "Other classes with this lesson assigned" section of the lesson details pop-up shows any classes in your school that have the same lesson assigned to any students in your class, making it easy to collaborate with other teachers and administrators to meet your instructional goals.*

With Achieve3000's new, automatically-provisioned standards-aligned courses, as well as robust curriculum planning tools that allow you to customize your lesson schedule and collaborate with other teachers and administrators, meeting your instructional goals has never been easier.
